# INTRODUCTION

This index is a guide to the subject content of the major articles which appeared in 1967 in the British technical journals listed on pages 1125-1130. It comprises about 26,500 entries arranged in a single alphabetical sequence of subject headings, together with supporting cross references.

## Subject Scope

The Index embraces all departments of Engineering and Chemical Technology, together with the various Manufacturing Processes based upon them. It also includes a great deal of material on the pure science (i.e. the physics or chemistry) of man-made objects and industrial processes. Instruments of all kinds are covered, irrespective of whether their field of application is in pure or applied science. Articles on the chemistry of individual substances are also indexed, as it is only very rarely possible to assert that a chemical species is entirely without technical interest. The *Index* does not cover Industrial Economics, but it does contain references to articles of a mixed technical-economic character. These are invariably signalled by the subheading 'Industry' as opposed to the more usual 'Manufactures' or 'Production' for the technical processes. Technology also overlaps the field of Management at several points, and here the policy of the *Index* is to include from the management sphere only material on such physical and statistical techniques as work study, ergonomics and operational research. Finally, it should be mentioned that the *Index* omits the applied biological sciences from its purview. Here again a number of borderline subjects are included. For instance, the production technology and the chemistry of food, drugs and pesticides are covered, but the physiological chemical aspects are excluded.

## Index Structure

The *Index* is designed primarily as a reference tool for tracing articles on highly specific topics. For this purpose the headings are detailed and generally co-extensive with the subjects of the articles listed.

The basic method of index construction may be illustrated by the treatment of such a subject

as 'Electroplating resistors with lead'. A single entry is made with supporting references, as follows:

**RESISTORS, Electroplating, Lead.**

LEAD, Electroplating, Resistors.

See RESISTORS, Electroplating, Lead.

ELECTROPLATING, Resistors.

See RESISTORS, Electroplating.

Additional facilities are given in two situations. When the first two elements of a heading are in the relation of Whole and Part, as in SHIPS, Diesel engines or MOTOR CARS, Bodies, then a second permuted entry (DIESEL ENGINES, Ships and BODIES, Motor cars) is given under the term representing the Part. This is considered desirable because interest in a particular component may often ignore the more comprehensive unit of which it forms a part. Considerations of a similar character arise in connection with Processes and Applications. The *Index* normally enters under the Application with a reference from the Process. There is a case for substituting a second entry for the reference, but it is felt to be less strong than the case for double entry for Whole-Part and Part-Whole, and it is not possible to have double entry for both in view of economic limitations on the size of the *Index*. The second occasion for the use of double entry is the subject which is a proper name, such as the name of a teaching or research institution, or the name of a prominent structure (realised or unrealised) such as the CHANNEL TUNNEL or FORTH ROAD BRIDGE. In these cases, entries are given both under proper name and under the term for the subject illustrated (e.g. BRIDGES, Suspension and TUNNELS).

In this *Index*, the subjects are entered directly into the alphabetical sequence, and not as sub-headings of more general terms, *as long as they can stand alone with unequivocal meaning*, corresponding to the subject of the article. Thus FUEL CELLS are entered directly, and not under ELECTRO-CHEMISTRY or GENERATORS, Electrical. The purpose here is again to facilitate specific topic searching. Though the *Index* is necessarily a cumbersome tool for broad field searching it has been thought desirable to signpost some varieties of subject relationship. *Index* users often discover pertinent material under a term narrower in meaning than that which they consulted first as approach term. Inquirers primarily interested in a particular application of a process may find useful information on other applications of the same process to parallel situations.

Relational signposting in the *Index* is carried out by references of two kinds. In the first place there are "Related heading" references which refer from more to less general terms. A number of classification schemes have been pressed into service in this connection. Not all of the various hierarchical steps are everywhere included. Thus the names of the various plastics are given as references at Plastics, and not via such intermediate groupings as Synthetic Resin Plastics, and Condensation Polymerised Plastics, though occasionally articles will appear covering these relatively generalised concepts. The "related heading" network for Chemistry is of the simplest kind. No attempt is made to link the various inorganic chemicals, and for organic chemicals only the intermediate concepts "Aliphatic" and "Cyclic" and "Heterocyclic" are brought into the system of references. For reasons of space no references are given between subheadings under the same main heading (e.g. AIRCRAFT, Engines and AIRCRAFT, Gas turbines). To compensate for this absence brief systematic synopses have been added at the beginning of certain of the longer sequences of subheadings.

The other relation-indicating mechanism is inherent in the system of inversion references, of which an example has already been given for

#### RESISTORS, Electroplating, Lead.

The person searching for this subject may also be marginally interested in (a) Lead, (b) Electroplating of lead, (c) Other applications of electroplating. The routine instruction is simply to note the sub-heading terms and then look them in in the main sequence. Thus at LEAD will be found entries for material on lead irrespective of application; there will also be cross references locating headings on particular applications including electroplating. At ELECTROPLATING will be found entries for articles on electroplating generally, and electrodeposition of various metals including lead, together with cross references to headings dealing with particular applications of electroplating.

#### Order of Elements in Headings

Most of the subjects indexed are composite in that they cannot usually be expressed in a single word or phrase. The question therefore arises as to which of the various verbal elements required for the heading shall be entry word and generally as to the order of the other elements in the heading.

The order of verbal elements or components is normally so devised that an account of a process applied to a particular application is placed under the term for the Application. Another invariable

rule is that the various word-elements are arranged left to right in order of decreasing concreteness with the most concrete element as the entry word. There are many situations in which recognisable differences in terms of concreteness and abstractness may not be apparent, and a number of rules have been devised for the indexers which regulate heading component order through a consideration of the relationships between the components. The following table illustrates the more commonly used heading constructions and their natural language equivalents.

#### *Compounds which specify a particular type or variety of Thing or Material:*

<i>Heading and subheading</i>	<i>Natural language</i>
1. THING <sub>1</sub> , Thing <sub>2</sub> CONVEYORS, Roller	Conveyors with Rollers
2. FUNCTION, Thing PRINTING, Inks	Inks for Printing
3. THING <sub>2</sub> , Thing <sub>1</sub> BUSES, Garages	Garages for Buses
4. THING, Property FABRICS, Coated	Fabrics with Coating
5. THING <sub>2</sub> , Thing <sub>1</sub> , TURBINES, Rotors THING <sub>1</sub> , Thing <sub>2</sub> ROTORS, Turbines	Rotors of Turbines

#### *Compounds denoting Actions or Properties of Things or Materials:*

6. THING, Property BEAMS, Strength	Strength of Beams
7. THING, Action upon it IRON, Corrosion	Corrosion of Iron
8. THING <sub>1</sub> , Action upon it, Thing <sub>2</sub> METALS, Forming, Magnetic pulse	Forming of Metals by Magnetic pulses
9. THING, Action upon it, Byproduct PHTHALIC ANHYDRIDE, Production, Tail gases	Tail gases as byproduct of Production of Phthalic anhydride
10. THING, Its Action LASERS, Welding	Welding by Lasers

#### *Other compounds*

11. ACTION <sub>2</sub> , Action <sub>1</sub> PACKAGING, Labelling	Labelling for Packaging
---	-------------------------

## 12. MATERIAL, Diversified role

PLASTICS, Building materials

Plastics as Building materials

N.B.—The subscript figures refer to order in English natural language using prepositions to indicate relationships. The term THING in examples 1–10 includes Materials.

These rules, taken separately or in combination, account for a high proportion of the indexing problems met.

### *Indexing of Locality terms*

A high proportion of the articles indexed deals with objects or activities at particular places. It is of course possible to decide in a general way that the place is or is not significant, but as usual there is a great number of debatable intermediate cases. The radical solution of indexing place in all such cases is ruled out on grounds of space and economics. The practice adopted is as follows:

(1) An article surveying comprehensively the methods practised in a particular country, or a particular species of product produced in a particular country, receives a reference from the country (and from the continent in the case of Africa and South America).

(2) An article dealing with an individual factory or its products does not normally receive a reference from place. Individual structures are not usually specified and referenced by locality, except in the following instances.

*Housing*

*Flats, Maisonnets*

*Churches, Monasteries and similar buildings*

*Government and municipal buildings*

*Town planning topics*

*Mines*

*Pipelines*

*Power stations (including Nuclear and Hydroelectric)*

*Dams*

*Coastal and Flood control works, Drainage, Water engineering*

*Roads*

*Buildings connected with transport.*

### *Ambiguity in headings*

The use of relational criteria in constructing headings goes some way towards reducing ambiguity of index headings. However, the omission of the actual relational terms or phrases can still occasionally lead to uncertainty of interpretation. Often this uncertainty is of a kind that matters little for information retrieval purposes. The heading

METALS, Extrusion, Presses

can mean that the article is about the extrusion by the press or it can be about the press which extrudes. It is doubtful if ambiguity of this kind

is of great practical importance. To distinguish an action, part or property, from the use of an action part or property term to denote a particular kind, e.g. Paint, Stoving—the stoving of paint, and Paint, Stoving, i.e. Stoving paints, the *Index* uses parentheses around a type-specifying word where the distinction seems required. The parentheses have the same sorting value as the commas which they replace.

### *Journals covered*

A list of the journals covered by this volume of the *Index*, together with their publishers' addresses, is to be found at the end of the book. It includes some titles no longer in existence. Society publications simply entitled *Journal of . . .*, *Proceedings of . . .*, or *Transactions of . . .* are entered in the list under the name of the society. (In *Index* citations these journal titles are given in the form used in the journal itself, with the abbreviations shown on page ix.)

Thanks are due to the publishers of many of these journals for supplying copies for indexing and so expediting the work.

### *Selection of articles for the Index*

An attempt has been made to select the more substantial articles published in the journals listed, though no evaluative criteria have been employed. The following types of material are normally excluded: (1) articles comprising less than a page of text and/or diagram in the usual format and typography, (2) brief resumés of symposia and conferences, (3) accounts of exhibitions, and other articles which consist of enumerative descriptions of a variety of products, (4) regular miscellany features, (5) students' features, (6) letters, (7) notes, (8) discussions, (9) book reviews other than essay reviews and review articles.

### *Indexing unit*

The unit of material indexed is the individual article or the part of an article which appears in a single issue of the journal. The various parts of an article published over several issues are therefore not all given the same heading where they are individually distinctive in subject matter.

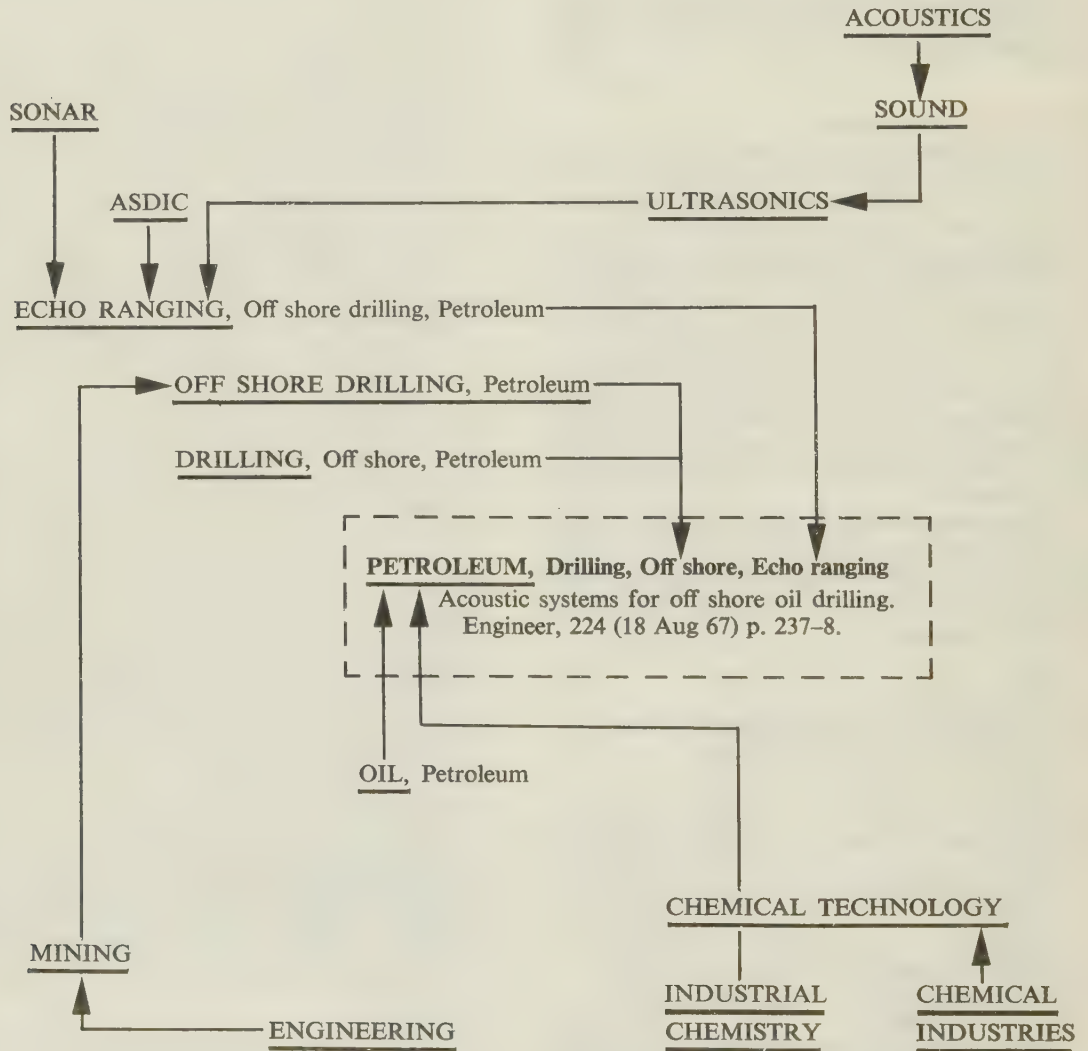

### *Synopses*

Brief systematic synopses are provided in some cases where there are long sequences of sub-headings under the same main heading. They are included because no connective references are supplied between sub-headings under the same main heading. They also afford a much simplified bird's eye view of the scope and ramifications of the material indexed under the headings concerned. The terms which are italicised in the synopses are found in their *direct* alphabetical position in the sequence of sub-headings. The terms printed in roman in the synopses are grouping terms only.

## DIAGRAM TO ILLUSTRATE INDEX STRUCTURE

Any of the underlined approach terms can be used for tracing an article on echo ranging in off shore drilling for petroleum. The arrowed lines represent cross references.

**COAL, Amination**

Introduction of primary amino groups into coal structure.

A.C. Bhattacharyya, A.K. Chatterjee & A. Lahiri. *Fuel: J. of Fuel Science*, 46 (Jan 67) p.25-7. refs.

**COAL, Artificial, Oxidation, Potassium permanganate, Benzenecarboxylic acids formation**

Alkaline permanganate oxidation of artificial coals prepared from lignin and cellulose. H. Tsukashima. *Fuel: J. of Fuel Science*, 46 (May 67) p.177-85. il. refs.

**COAL, Ash, Melting, Effect of silica**

Influence of silica on some properties of coal ash. W. Szulakowski. *J. of Inst. of Fuel*, 40 (Dec 67) p.564-8. refs.

**COAL, Bituminous, Ash, Determination of sulphur, X-ray emission spectroscopy**

Determination of sulphur in fly-ash by x-ray emission spectroscopy. S. C. Goody & J. F. Stephens. *Fuel: J. of Fuel Science*, 46 (Jan 67) p.19-24. refs.

**COAL, Bituminous, Surfaces, Oxidation, Air, Studies, Flotation, Collectors, Potassium chloride**

New possibilities for investigating air-oxidation of coal surfaces at low temperatures. J. Iskra & J. Laskowski. *Fuel: J. of Fuel Science*, 46 (Jan 67) p.5-12. il. refs.

**COAL, Bituminous, Thermal analysis, Electrical conductivity Measurements**

Method of thermal analysis of polymers by measurement of electrical conductivity. M. I. Pope. *Polymer*, 8 (Feb 67) p.49-56. il. refs.

**COAL, Boilers. See BOILERS, Coal****COAL, Boilers, Power stations. See POWER STATIONS, Boilers, Coal****COAL, Briquetting, Effect of macerals**

Effect of maceral composition on the binderless briquetting of hot char. M.F. Woods, G.M. Habberjam, K. Elsworth & S. Bennett. *Fuel: J. of Fuel Science*, 46 (May 67) p.193-209. il. refs.

**COAL, Brown, Determination of calcium, Spectrophotometry, Atomic absorption**

Atomic absorption analyses of calcium in brown coal using a resonance lamp as monochromator. P. L. Boar & J. V. Sullivan. *Fuel: J. of Fuel Science*, 46 (Jan 67) p.47-52. il. refs.

**COAL, Brown, Firing, Boilers, Power stations. See POWER STATIONS, Boilers, Brown coal fired****COAL, Brown, Resin content**

Constitution of an Australian brown coal resin. J. D. Brooks & J. R. Steven. *Fuel: J. of Fuel Science*, 46 (Jan 67) p.13-18. il. refs.

**COAL, Carbonisation, Products, Electrical conductivity**

Conductance of the products of combustion of coal. W.A. Gray & J.L. Smith. *J. of Inst. of Fuel*, 40 (May 67) p.186-92. il. refs.

**COAL, Chemicals**

Coal and chemicals. R. J. Morley. *Mining Electrical & Mechanical Engr.*, 48 (Jul 67) p.141-5. il.

**COAL, Chemicals, Plant, Corrosion**

Corrosion in a coal chemicals plant. A. N. Bose. *Chemical Processing*, 13 (Mar 67) p.64-8. il.

**COAL, Chlorinated, Carbonisation**

Halogenation of coal. Pt.3: carbonization and graphitization of chlorinated coals. R. Oxtoby. *Fuel: J. of Fuel Science*, 45 (Nov 66) p.457-67. il. refs.

**COAL, Chlorinated, Graphitisation**

Halogenation of coal. Pt.3: carbonization and graphitization of chlorinated coals. R. Oxtoby. *Fuel: J. of Fuel Science*, 45 (Nov 66) p.457-67. il. refs.

**COAL, Chlorine**

Relationship between sodium and chlorine in some British coals. G.N. Daybell. *J. of Inst. of Fuel*, 40 (Jan 67) p.3-6. refs.

**COAL, Cleaning, Fines, Drying, Ultrasonics**

Acoustic drying of coal. H. V. Fairbanks & R. E. Cline. *Colliery Engng.*, 44 (May 67) p.184-7. il.

**COAL, Coking. See COKING, Coal****COAL, Containers**

Development of coal containers. *Colliery Guardian*, 215 (21 Jul 67) p.83-4. il.

New container service for coal. *Colliery Guardian*, 215 (6 Oct 67) p.378-9. il.

**COAL, Determination of phosphates, Oxidation, Nitric acid—Potassium chlorate**

Wet oxidation of coal with nitric acid and potassium chlorate and its use in the determination of phosphorous. S. S. Asthana. *Chemistry & Industry* (4 Feb 67) p.190. refs.

**COAL, Distribution**

Bulk transport waits for the green light. R. Bailey. *Times Rev. of Industry & Technology*, 5 (Apr 67) p.46-7. il.

**COAL, Distribution, Road transport services**

4,250 problems—that's the challenge facing new NCB transport chief. S. Buckley. *Commercial Motor*, 125 (10 Mar 67) p.66-7

**COAL, Dust—Air, Dust concentration, Determination, Beta radiation, Absorption**

Use of a radioactive beta source to monitor high airborne-dust concentrations. A. J. Williams. *J. of Scientific Instruments*, 44 (Jul 67) p.562-3. il. refs.

**COAL, Electrical properties**

Electrical properties of coals and carbonized materials. K. Ouchi. *Fuel: J. of Fuel Science*, 46 (Mar 67) p.71-85. il. refs.

**COAL, Electron spin resonance, g-values**

E.P.R. g-values of coals. H.L. Retcofsky, J.M. Stark & R.A. Friedel. *Chemistry & Industry* (5 Aug 67) p.1327-8. refs.

**COAL, Flotation, Collectors, Cresol, Frothability, Measurement**

Frothing characteristics of cresols in the flotation of coal. A. A. Yousef & T. R. Boulos. *Colliery Engng.*, 44 (Sep 67) p.365-7. il. refs.

**COAL, Heating, Detection, Radiometers**

Portable radiant-heat detector for the detection of overheated surfaces. R. Wilson. *Colliery Guardian*, 214 (20 Jan 67) p.82-4. il.

**COAL, Hydroxylation, Pernitrous acid**

Effect of hydroxyl groups on the properties and behaviour of coals. P. N. Mukherjee, L. V. Ramchandran, D. S. Chatterjee & A. Lahiri. *Fuel: J. of Fuel Science*, 45 (Nov 66) p.447-50. refs.

**COAL, Ignition, Spontaneous**

New factors in the self-ignition of coals. E. Varga. *Colliery Guardian*, 214 (13 Jan 67) p.55-60. il. refs.

**COAL, Ignition, Spontaneous, Detection**

Early detection of spontaneous combustion. Pt.1: field investigations. C. Narain. *Colliery Guardian*, 214 (2 Jun 67) p.609-15. il. refs.

Early detection of spontaneous combustion. C. Narain. *Colliery Guardian*, 214 (9 Jun 67) p.637-41. il. refs.

**COAL, Industry, Europe**

Europe's problem of coal production. J. T. Corner. *Mining Equipment International*, 17 (Dec 66) p.4-6. il.

**COAL, Industry, France**

Production and consumption: variety of trends. *Colliery Guardian*, 214 (3 Feb 67) p.128

Regional "industrialization offices" in France. *Colliery Guardian*, 214 (24 Feb 67) p.210

Trends in French energy consumption. *Colliery Guardian*, 214 (28 Apr 67) p.461.

**COAL, Industry, Great Britain**

Challenge of change. H. J. Widdowson. *Mining Engr.*, 127 (Oct 67) p.43-7

Challenge to young mining engineers. A.R. Blair. *Mining Engr.*, 127 (Nov 67) p.105-7

Fuel policy and the future of the coal industry. Lord Robens. *Mining Engr.*, 127 (Nov 67) p.57-62

Fuel policy—The White Paper (summary of chapter 5) *Colliery Guardian*, 215 (24 Nov 67) p.594-6

National Coal Board annual report 1966-67, pt.2. (extracts) *Colliery Guardian*, 215 (8 Sep 67) p.267+

Tale of the bacon slicer [Caeduke centre, Gorseinon] *Technical Education*, 9 (May 67) p.198-9. il.

**COAL, Mining, Education (Management)**

Training young mining engineers for colliery management. K.N. Underhill. *Mining Engr.*, 126 (Jan 67) p.251-2

**COAL, Mining, Electrical equipment, Earth leakage protection, Core balance**

Current balance earth-leakage device. L. C. Eales. *Colliery Guardian*, 214 (5 May 67) p.506-8. il. refs.

**COAL, Mining, Electrical equipment, Intrinsic safety, Arc suppression, Diodes, Silicon**

Use of diodes as safety devices in intrinsically safe circuits. P. Tolson. *Mining Electrical & Mechanical Engr.*, 48 (Jan 67) p.21. refs.

**COAL, Mining, Engineering**

Our future is now. C.J. Gadsby. *Mining Electrical & Mechanical Engr.*, 47 (Dec 66) p.133-5

**COAL, Mining, Engineering, Management**

Engineering organization at a large colliery. M. Nattrass. *Mining Electrical & Mechanical Engr.*, 47 (Dec 66) p.136-9

**COAL, Mining, Equipment**

Productivity aids. H. G. Bell. *Colliery Engng.*, 44 (Jul 67) p.271-7. il.

**COAL, Mining, Equipment, Inspection**

Some aspects of a Union inspector's work (abridgement) H. M. Harrison. *Mining Electrical & Mechanical Engr.*, 48 (May 67) p.103-106

**COAL, Mining, Equipment, Maintenance, Inspection**

Role of inspection in maintenance workshops. W.R.T. Farmer. *Plant Engr.*, 11 (Oct 67) p.423-9. il.

**COAL, Mining, Equipment, Manufactures**

Gebrüder Eickhoff. *Colliery Guardian*, 213 (30 Dec 66) p.809-11. il.

**COAL, Mining, Equipment, Mobility**

Mobility of longwall equipment. R.L.J. MacRae. *Colliery Guardian*, 213 (30 Dec 66) p.813-15. il.

**COAL, Mining, Equipment, U.S.A.**

Mobility of underground equipment in the USA. J.B. Long. *Colliery Guardian*, 213 (16/23 Dec 66) p.782-7. il.

**COAL, Mining, Explosives**

Use of explosives in Continental Europe. R. Loison. *Mining Engr.*, 126 (Jun 67) p.583-94. il. refs.

**COAL, Mining, Face selections, Operational research, Search trees, Computers, Programs**

Heuristic tree-search method of selecting face schedules at a colliery. K. Knowles, R.M. Tagg & P.N. Thompson. *Operational Research Q.*, 18 (Jun 67) p.139-48. il. ref.

**COAL, Mining, Face supports. See PIT-PROPS****COAL, Mining, Firedamp, Detectors**

Methane detection in mines. *Mining Magazine*, 116 (Mar 67) p.189

**COAL, Mining, Firedamp, Detectors, Effect of pressure**

Effect of abnormal pressure on methane detection. K. S. Rachamalla. *Mining Engr.*, 126 (Feb 67) p.357-66. il. refs.

**COAL, Mining, Firedamp, Detectors, Performance, Effect of pressure**

Effects of abnormal pressure on methane detection. K. S. Rachamalla. *Colliery Guardian*, 214 (7 Apr 67) p.385-90. il. refs.

**COAL, Mining, Fires**

Tragedy at Michael [East Wemyss, Fife] *Colliery Guardian*, 215 (15 Sep 67) p.292

**COAL, Mining, Fires, Detection, Equipment**

Minerva mine fire detector [Minerva T86] *Colliery Engng.*, 44 (Feb 67) p.62-4. il.

**COAL, Mining, Fires, Methane drainage**

Methane problems experienced in Lancashire and their relationship with the technique of methane drainage. W. Highton. *Colliery Guardian*, 215 (20 Oct 67) p.445-54. il.

**COAL, Mining, Fires, Salvage**

Sealing and opening up a district following spontaneous combustion in the Barnsley seam. J. C. Wehrle & A. Bulmer. *Colliery Guardian*, 215 (21 Jul 67) p.71-8. il.

**COAL, Mining, Fires, Sealing off**

## COMPUTERS, Analogue, Averagers, Running, Electro-mechanical

Electromechanical running averager. K. C. Ng & K. K. Murthy. *Electronic Engng.*, 39 (Mar 67) p.169-71. il. ref.

COMPUTERS, Analogue, Critical path analysis. See CRITICAL PATH ANALYSIS, Computers, Analogue

COMPUTERS, Analogue, Displays, Tracks, Charged particles. See PARTICLES, Charged, Tracks, Displays, Computers, Analogue

## COMPUTERS, Analogue, Flow diagrams, Symbols

Symbols for analogue and hybrid computation. *Computer Bull.*, 11 (Sep 67) p.174-7. il.

COMPUTERS, Analogue, Flowmeters, Distribution, Natural gas. See GAS, Natural, Distribution, Flowmeters, Computers, Analogue

COMPUTERS, Analogue, Formulation, Mixing, Animal feeding-stuffs. See ANIMAL FEEDINGSTUFFS, Mixing, Formulation, Computers, Analogue

COMPUTERS, Analogue, Hydraulic engineering. See HYDRAULIC ENGINEERING, Computers, Analogue

COMPUTERS, Analogue, Hydraulic machinery design. See HYDRAULIC MACHINERY, Design, Computers, Analogue

## COMPUTERS, Analogue, Integrators, Resetting, Switches, Semiconductor

Analogue switches for computer mode control. N.W. Bellamy & S.R. Styler. *Electronic Engng.*, 39 (Aug 67) p.512-15. il. refs.

COMPUTERS, Analogue, Motion analysis, Berthing, Ships. See SHIPS, Berthing, Motions, Analysis, Computers, Analogue

COMPUTERS, Analogue, Multipliers, Triodes, Double  
Simple high-speed analogue multiplier. J. P. Wilson. *Electronic Engng.*, 39 (Jan 67) p.11-14. il. refs.

Dynamic displacements in a diesel-engine main bearing. W.L. Cooke. *Instn. of Mechanical Engrs. Proc.*, 180 pt.3K (1965-66) p.184-204. il. refs.

**DIESEL ENGINES, Bearings, Journal, Loading, Dynamic, Calculations, Computers**

Investigation into the performance of dynamically loaded journal bearings: design study. T. Lloyd, R. Horsnell & H. McCallion. *Instn. of Mechanical Engrs. Proc.*, 181 pt.3B (1966-67) p.28-34. il. ref.

**DIESEL ENGINES, Bearings, Journal, Loading, Dynamic, Hydrodynamic theory**

Hydrodynamic theory of dynamically loaded bearings and its application to engine bearing design. H. W. Hahn & K. Rodermacher. *Inst. of Mechanical Engrs. Proc.*, 181 pt.3B (1966-67) p.35-44. il. refs.

**DIESEL ENGINES, Bearings, Roller**

SKF cylindrical roller bearings for a 10000 hp M.A.N. diesel engine [Maschinenfabrik Augsburg-Nürnberg AG (M.A.N.), Augsburg] O. Braitsch. *Ball Bearing J.* (Feb 67) p.31-3. il.

**DIESEL ENGINES, Blocks, Honing**

Chaphone honing machine for V-8 cylinder blocks. *Machinery*, 111 (4 Oct 67) p.723-4. il.

**DIESEL ENGINES (Buses) Air cooled**

Air-cooled double-deckers. P. A. C. Brockington. *Commercial Motor*, 125 (9 Jun 67) p.68-9. il.

**DIESEL ENGINES, Commercial vehicles. See VEHICLES, Commercial, Diesel engines****DIESEL ENGINES, Components, Machining**

Modern machining methods: a challenge to foundry techniques. T. Hurst. *Brit. Foundryman*, 60 (Jun 67) p.232-8. il.

**DIESEL ENGINES, Components, Testing**

Test rigs for engine components. E. J. Nestorides. *Instn. Mechanical Engrs. Proc.*, 181 pt.3H (1966-67) p.119-29. il. refs.

**DIESEL ENGINES, Compound**

Comparative performance assessment by digital computers of various compression-ignition engine configurations in combination with compressors and turbines. R. Smyth, & F.J. Wallace. *Instn. of Mechanical Engrs. Proc.*, 181 pt.1 no.12 (1966-67) p.259-91. il. refs.

**DIESEL ENGINES, Connecting rods, Fork and blade**

Some problems in the design and development of fork and blade connecting rods for 'vee' farm engines. M. F. Clover & A. J. Edwards. *Instn. of Mechanical Engrs. Proc.*, 181 pt.3H (1966-67) p.39-50. il. refs.

**DIESEL ENGINES, Connecting rods, Machining, Transfer machines**

Drilling—milling—tapping: two con-rods and caps every 56 seconds [Middlesex Machine Tool Co. Ltd. at Perkins Engines Group Ltd.] *Machine Tool Engng.*, 49 no.2 (1967) p.21-5. il.

**DIESEL ENGINES, Connecting rods, Stresses**

Mechanical stresses in pistons, gudgeon pins, and connecting rods. B. Lawton & D.E.G. Crutcher. *Instn. of Mechanical Engrs. Proc.*, 181 pt.3H (1966-67) p.20-30. il. refs.

**DIESEL ENGINES, Cooling, Water, Pressurised**

Cooling of diesel engines by water under pressure. J. Gratzmuller & S. J. Davies. *Instn. of Mechanical Engrs. Proc.*, 181 pt.1 no.6 (1966-67) p.105-14. il. refs.

**DIESEL ENGINES, Crankcases**

Design of a space-frame crankcase for a large medium-speed diesel engine [Ruston AO] G.W. Morland & B.S. Flear. *Instn. of Mechanical Engrs. Proc.*, 181 pt.3H (1966-67) p.61-70. il. refs.
